

***Pulse: A History, Philosophy, and Sociology of Science Journal***  
**Call for Papers: Issue 5, 2017**

*Pulse* is a double-blind, peer-reviewed graduate journal for the History, Philosophy, and Sociology of science. After four successful issues, the journal aims at continuing to build on its achievements, at integrating a wider array of contributors, and at expanding its international audience. The fifth issue is currently scheduled for publishing during the summer of 2017. *Pulse* aims to be a vehicle for thought-provoking and original research on scientific inquiry from a multitude of perspectives. We welcome a broad range of thoughts and approaches related to history, sociology, and philosophy of science.

Previous issues have contained approaches including: traditional analytic as well as applied and empirically-centered philosophy of science, sociological approaches to science from constructionist approaches to statistical analyses, historical analysis of scientific research and/or its influence, feminist approaches to science, new materialism, biopolitics, technology studies, and philosophy of the mind and brain sciences.

For the fifth issue of *Pulse* we welcome the submission of articles that engages with any aspect of HPSS and Science Studies, and from any scholarly perspective. We particularly encourage the submission of inter-disciplinary work and work that seeks to engage with intersections between academic approaches to, or perspectives on, science.

Topics could include, but are not limited to:

- Complexity in the life sciences and systems-level research
- Values in science, expertise, and inductive risk
- Philosophy and physics of time
- Neurophilosophy, mind and brain approaches to the study of consciousness
- Feminist approaches to scientific research, new materialism, and biopolitics
- Technology and scientific knowledge production
- Medical humanities and digital humanities in the context of science studies
- Philosophy of video games
- Early modern natural philosophy, natural history, medicine & chemistry, early modern empiricism and experimentalism
- Science and pseudoscience
- Pragmatism, science, and philosophy.

We welcome the submission of both short position pieces (2,000-3,000 words) and full articles (5000-7000 words) on these and related themes. We also publish book reviews (800-1000 words), please get in touch if there is a book you would like to review.

**Submission Deadline:** 1<sup>st</sup> March 2017.

All articles should be prepared for blind review including the removal of authorship from the document file information. Submissions should include a cover sheet on a separately attached document containing: the paper title and short abstract (ca. 250 words) author's name, affiliation, word count (including footnotes & references), and contact information. Article and cover sheet should be submitted in a .doc, .docx, or .odt (or similar open-source) file format. PDF submissions are also accepted but previously stated file formats are preferred where possible.

All articles and related material should be submitted to: [submissions.pulse@gmail.com](mailto:submissions.pulse@gmail.com)

For any inquires please feel free to contact us at [pulse.scistudies@gmail.com](mailto:pulse.scistudies@gmail.com) please *do not* submit articles to this email address.
